

EL-MIG 200 PULSE 3+

Multi-purpose welding system

DIE EL-MIG 200 PULSE 3+ THE VERSATILE 3-TORCH SYSTEM

The EL-MIG 200 Pulse 3+ is a single-phase multi-purpose device with 200 amps, inverter generator for MIG pulse, MIG double pulse, MIG-MAG, stick and TIG welding (with 'lift' ignition).

This versatile 3-torch system can be configured for steel, aluminium, MIG soldering and any other combination.

- Simple welding installation and programming with selectable options
- Pulse or double-pulse operation
- Double roller drive for precise and even wire feed
- Suitable for TIG and stick electrode welding

APPLICATIONS

Corrective maintenance Rework and repairs

Special-purpose and mechanical engineering

EL-MIG 200 PULSE 3+

Technical information

The multifunctional, synergic inverter power source with fully digital control system delivers first-rate welding quality in both MIG/MAG, as well as pulsed and dual-pulsed MIG processes for all materials.

Also suitable for stainless steel, aluminium and galvanised steel. The low-spatter welding function minimises the need for reworking and ensures outstanding performance in TIG and MMA welding processes.

TECHNICAL INFORMATION

Welding performance

Open circuit voltage ca. 60 V DC

Connection data

Mains voltage 230 V, 50 Hz

Protection type IP 23 S

Dimensions (H / B / T) 780 x 520 x 570 mm

Height with torch holder 1900 mm

Weight 46,5 Kg

STANDARD EQUIPMENT

- Gas-cooled
- 3 torch 3 m
- Torch holder
- 3 integrated wire feeders
- Pressure reducer
- Trolley with holder for 2 gas cylinders
